TECHNICAL SKILLS

Languages & Frameworks:

Python, Flask, FastAPI

AI / GenAI / ML: LangChain, Gemini LLM, Mistral AI, RAG Pipelines, Agentic AI Workflows, Prompt Engineering, Transformers, Embeddings, Chunking Strategies, OpenCV, Pandas

Vector Databases & Search:

ChromaDB, Semantic Search, Embedding Workflows

Cloud & AI Platforms: Google Vertex AI, Google Cloud Platform (GCP)

Databases: PostgreSQL, MySQL

DevOps & Tools: Git, GitHub, Jira REST API, Jenkins

Responsible AI & Security: Guardrails

Observability & Monitoring: Token Usage Tracking, Latency Monitoring, Error Tracing, Structured Logging

Methodologies: Agile Scrum, Microservice, Technical Documentation, Cross-team Collaboration

PROFESSIONAL SUMMARY

Results-driven Senior Python Developer with 9+ years of experience designing and delivering high-performance, distributed applications and AI/GenAI solutions in enterprise environments. Proven expertise in building end-to-end RAG pipelines, LLM-powered applications, and agentic AI workflows using LangChain, Google Vertex AI (Gemini), and vector databases. Strong background in transformers, embeddings, chunking strategies, and retrieval systems. Experienced in implementing observability and monitoring for AI systems, applying responsible AI practices (guardrails, PII filtering, safe deployment), and leading cross-functional Agile Scrum teams. Adept at mentoring junior engineers and acting as a technical escalation point to deliver scalable, production-grade solutions aligned with enterprise compliance requirements.

PROFESSIONAL EXPERIENCE

GenAI Engineer | Senior Python Developer

Tata Consultancy Services | Hyderabad, India | November 2022 - Present

- Architected and deployed a production-grade Retrieval-Augmented Generation (RAG) chatbot on Google Vertex AI using Gemini LLM, integrated with LangChain for orchestrating multi-step retrieval pipelines, prompt templates, and conversational memory — reducing manual query handling by ~60%.
- Designed agentic AI workflows with LangChain agents and custom tool integrations, enabling autonomous multi-step reasoning and decision-making over enterprise document repositories serving 500+ users.
- Integrated vector databases (ChromaDB) with optimized chunking strategies, custom retrievers, and embedding workflows for efficient semantic search — improving chatbot response accuracy by 35% and cutting retrieval latency by 40%.
- Implemented observability and monitoring for AI systems including token usage tracking, latency dashboards, error tracing, and embedding drift detection using structured logging and metrics pipelines, improving system reliability to 99.2% uptime.
- Applied responsible AI and security controls including guardrail layers, PII filtering, DLP policies, and safe deployment practices across all LLM-powered services, ensuring enterprise compliance and data security standards.
- Fine-tuned Gemini LLM prompts, optimized embedding caching, and integrated LangChain memory modules — reducing end-to-end pipeline latency by 45% and improving user satisfaction scores by 28%.
- Designed and deployed a full-stack Flask web portal integrated with the Jira REST API, enabling creation, retrieval, and modification of Jira issues, reducing ticket creation time by 50% and supporting 200+ daily active users with PostgreSQL backend.
- Led the SAP Backup Automation initiative — developed Python scripts for scheduled multi-database backups integrated with Networker and Cohesity, achieving 100% backup success rate and eliminating ~10 hours/week of manual operations.
- Collaborated with mid-level managers and peer engineers in Agile Scrum ceremonies; served as escalation point and mentor for junior developers, improving team velocity by 20% across three sprints.
- Utilized Git for version control, code reviews, and CI/CD integration across all projects, maintaining clean branching strategies and deployment pipelines.

PROFESSIONAL EXPERIENCE

Senior Python Developer

IDC Technologies | Hyderabad, India | December 2021 – November 2022

- Deployed as a Senior Python Developer at Tata Consultancy Services client site, delivering technology solutions aligned with enterprise business objectives and client compliance requirements.
- Contributed to large-scale planning and design of distributed Python-based backend systems, collaborating with cross-functional teams to resolve complex technical challenges.
- Supported knowledge transfer, documentation efforts, and technical guidance for team members in an Agile environment.

Senior Python Developer

Zen Exim Pvt. Ltd. | Ahmedabad, India | January 2021 – May 2021

- Engineered a real-time Face Recognition Attendance System applying deep learning and computer vision (OpenCV) for automated user identification with and without masks — achieving 94% recognition accuracy.
- Developed ML model training and enrollment pipelines using supervised learning techniques, enabling real-time recognition model updates with new user data.

Software Developer

Turabit Solutions Pvt. Ltd. | Ahmedabad, India | June 2019 – January 2021

- Built Flask-based web applications and AI-powered customer-facing chatbots integrated with MySQL for data persistence and user interaction tracking.
- Automated Active Directory user lifecycle management (create, disable, enable, bulk operations) using LDAP and PowerShell scripting, reducing IT admin workload by 30%.
- Developed timer and scheduler modules with automated email notification workflows, improving operational response time for task-critical processes.

Support Engineer

Star Link Communications Pvt. Ltd. | New Delhi, India | June 2017 – May 2019

- Provided technical support and root cause analysis for biometric systems and software, maintaining high resolution rates for both routine and complex incidents.
- Communicated technical concepts clearly to users of diverse backgrounds, demonstrating strong verbal and written communication skills.

EDUCATION

Bachelor of Technology – Electronics and Communication Engineering

GIET, Gunupur | 2014

PERSONAL DETAILS

SEX : Male
Date of Birth : 04th March 1993
Language : English, Hindi, Odia
